

Microsimulations

A Brief Overview

Close the capability gap with immersive, bite-sized and impactful simulations.

Immersive Learning and Decision-Making

Using immersive design and gamification, teams can gather insights, assess impacts, and make effective decisions with strategies and tools, just as they do in a live event.

Organization-Wide Engagement

iluminr's unique resilience-building approach engages everyone, from the CEO to the shop floor, through immersive, bite-sized single and multi-player Microsimulations that simulate crises and rapid change.

Diverse Scenario Library

iluminr's comprehensive Microsimulation library covers cyber- attacks, third-party disruption, supply chain shocks, extreme weather events and more, preparing teams to confidently tackle real-world challenges.

Reignite Engagement and Build Capabilities

Gamify Agility Building

Deliver engaging and impactful learning through short scenario exercises with iluminr's Microsimulations, accessible anytime, anywhere, on any device - boosting participation and engagement.

Develop Capability

Engage your team and third parties more frequently and efficiently with experiences that build critical skills and better prepare them for gameday. Our Microsimulations target all organizational levels, supporting participants to translate learning into practical application.

Meet Compliance Requirements

Theory alone is insufficient to master an effective and compliant response. Microsimulations combine storyliving with interactive learning, applying best practices to real scenarios. This approach enhances skills, enables data analysis, identifies gaps and tracks progress for gameday readiness.
